

AquaKlear treatment systems protect the environment by naturally treating wastewater generated by residential & commercial activities

BETTER THAN SEPTIC®

AquaKlear's feature packed design addresses difficult site challenges & provides years of affordable, trouble free & reliable treatment

BETTER TREATMENT

NSF/ANSI tested & certified AquaKlear systems provide critical protection for the *even the most environmentally sensitive areas*

BETTER SELECTION

With 17 models (in either fiberglass or concrete) ranging from 500-1,500 gpd, AquaKlear offers countless design & installation configurations

BETTER PERFORMANCE

The amazing AquaKlear system produces high quality recycled water that is safe & clean enough to be reused for landscape irrigation: **Use Your Water Twice®**

BETTER INVESTMENT

AquaKlear is more affordable to install, operate & maintain than other complicated & expensive systems, saving thousands of dollars over the life of the system

BETTER FOR THE ENVIRONMENT

AquaKlear's proven performance preserves property values & helps protect the health of the community & environment

- ✓ single family
- ✓ multi family
- ✓ clusters
- ✓ subdivisions
- ✓ commercial

BETTER TECHNOLOGY

The heart of each AquaKlear aerobic system features our innovative **CLARIFYING TRIO™** — three critical components that naturally & completely reduce nutrients & solids

AK Fine Air Bubble Diffuser

The AK Fine Air Bubble Injector injects millions of dissolved oxygen bubbles into the aeration chamber throughout the day, creating a powerful microbial cell mass which, in turn, enables industry-leading rebounds after "shock load" conditions.

Dual Outlet Compressor

"The Compressor with a Brain"

Smart enough to know when and where to send air, our intelligent dual outlet compressor is the brains behind the AquaKlear system.

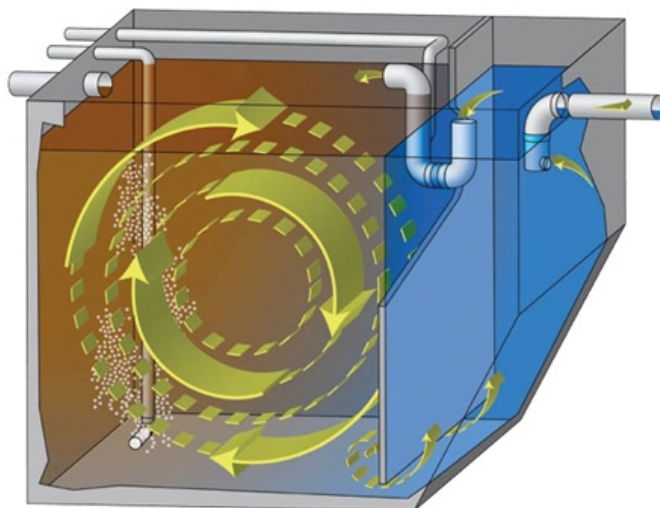

AK Skimmer

The AK Skimmer's simple, yet ingenious design reintroduces clarified waste back into the aeration chamber, maintaining AquaKlear's endless cycle of wastewater purification.

Better Than Septic® manufactures & distributes AquaKlear treatment systems for wastewater projects throughout California & Hawaii
