

Water Saving Kitchen Tips

Approximately 20% of your home's water usage is attributed to the KITCHEN

#

01

REUSE

Capture water in a tub when rinsing fruits, veggies & dishes - then **REUSE** the water for plants or landscaping

#

02

GARBAGE DISPOSAL

Garbage disposals are **not recommended** for septic systems because they require a lot of water & add a lot of food waste

#

03

DISHWASHER

Modern dishwashers do not require pre-rinsing - use the **RINSE & HOLD** feature until you're ready to run a full load

#

04

LEAKS

A single water faucet leak can waste **over 300 gallons per month** - promptly repair leaky fixtures
